Singleton Design Pattern

Case studies and real-world examples

OOPS Concepts in Java

Core principles:
Encapsulation, inheritance,
polymorphism, and
abstraction

Immutability in Java

Internal code insights and
case studies

Memory Management

Garbage collection case
studies & case studies and
optimizations

Java 8 Features

Key features with code
snippets and usage

Relationships in Java

IS-A, HAS-A relationship
concepts.
Examples and project-based
applications

Cloning in Java

Use cases and practical
implementation w.r.to your
projects

Map Collection

Internal working and code-
based case studies

Exception Handling

Best practices and handling
techniques

equals() and hashCode()

Case study on overriding and
usage scenarios

Threads and Concurrency

Key concepts and real-time case studies

Java Architecture

Understanding JVM, JRE, and JDK components

Abstract Class vs Interface

Differences across Java versions

Java Keywords

Important keywords with code examples (static, final, private)

Comparable vs Comparator

Modern syntax and examples (Java 8+)

String Class and String Pool

Real-time examples and case studies

Java Collections

Usage in projects and practical case studies

Latest Java Versions and Features

Newest additions in Java (Java 17, Java 21, Java 22.)

Wrapper Classes

Autoboxing, unboxing, and use cases

final, finally, and finalize()

Differences and usage in code

Thread Lifecycle

Stages and transitions in thread execution

Design Patterns in Java

Key patterns with project case studies

Serialization and Deserialization

Concepts and practical examples

Additional Core Java Concepts

Includes Class Loaders, Reflection, and other essentials

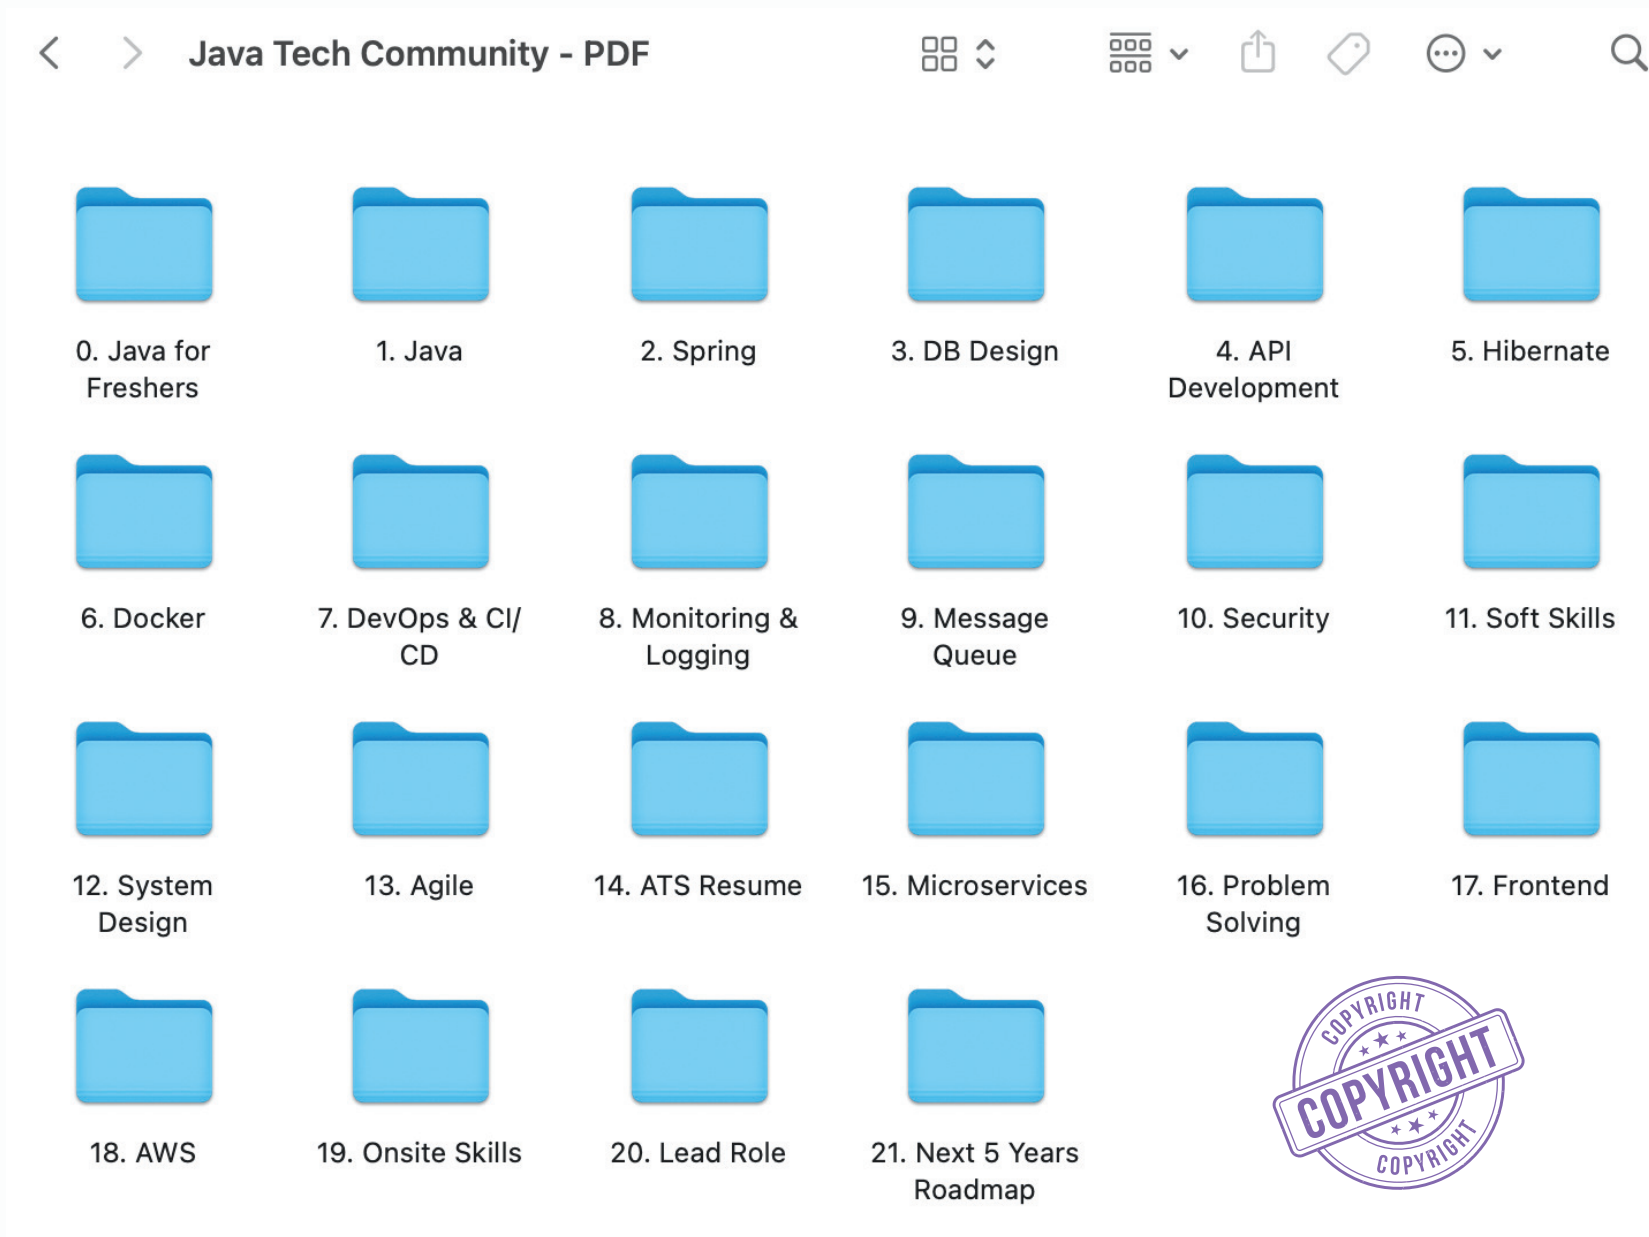

SOLID Principles

Concepts and case studies with respect to your project

**ALL THE RESOURCES YOU NEED TO CRACK ANY JAVA
INTERVIEW – WHETHER YOU’RE A **FRESHER**, **EXPERIENCED**, OR
AN **EXPERT**!**
