TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL, HTML5, CSS3
Technologies: Spring Boot, Angular, Java AWS-sdk, Elasticsearch, AWS cloud(Cloud watch, SQS, S3, SES), MYSQL Postgres, Redis, Terraform, Node JS, Serenity BDD, Cucumber
Concepts: Object Oriented Programming, Microservices Architecture, Data Structures and Algorithms, Rest APIs Agile, Java Design Patterns, CI/CD, SDLC, AI-Transformers
Tools: Git, Maven, Gradle, Swagger, Postman, Pgadmin, Jenkins, Docker, Kubernetes, Jira, confluence

WORK EXPERIENCE

Clarivate, Bangalore

August 2022 - present

Software Engineer

- 2 years of experience in full stack development with expertise in **Angular** and **Spring Boot**.
- **Singularity-Search Project Contribution:** played a pivotal role in the Singularity-search project, Singularity is a critical content technology cross platform utilized by data analysts and editorial teams in **Life Sciences and Health Care**. Crafted scalable and maintainable **Springboot** Application, ensuring the platform's robustness and efficiency in search operations of Singularity Application.
- **Search Optimization:** Implemented optimization techniques in **Elasticsearch**, reducing API request latency by 40% , and developed **Resolution APIs** to enable efficient access to search platform data across multiple **microservices**.
- **Automation of Onboarding Processes:** Automated the different editorial units onboarding process for the Singularity-search platform with a one-click solution, eliminating the need for a dedicated development team and reducing onboarding time by 80%.
- **Business Feature Development:** Developed advanced business features, including search metrics using **PostgreSQL**, **AWS services(SQS & SES)**, **AWS-sdk** and **Spring Boot scheduler** to track search operations, diversity, and failure alert notifications for data publishers. These features provided critical value to the business, improving system reliability and enhancing business insights.
- **Redis Integration and Microservice Automation:** Successfully integrated **Redis** into microservices, optimizing data retrieval speeds for **S3** calls within the service layer. Led proof of concepts (POCs) to automate **microservices**, transforming them into more generalized data consumers, significantly enhancing operational efficiency and scalability.
- **AI and Machine Learning Integration:** Utilized advanced **AI transformers**, including BERT, T5, OpenAI, Gensim, and other open-source models, to generate extractive summaries from search platform metadata, enhancing content curation capabilities.

Clarivate Analytics, Bangalore

April 2022 - July 2022

Content tech Intern

- **REST APIs Development & Testing :** Contributed to the Singularity project by developing and enhancing **REST APIs** using **Spring Boot**, **Postman**, and **Swagger**, ensuring seamless integration and functionality within the Singularity-search platform. Authored comprehensive test cases for API automation using **Gherkin** language, **Serenity BDD**, and **Cucumber** framework, improving test coverage and ensuring higher reliability of the APIs.

EDUCATION

Visvesvaraya Technological University

July 2018 - July 2022

B.E (Electronics & Communication engineering)

CGPA: 8.5

REWARDS AND RECOGNITION

- **Super Star Contributor** – Awarded for exceptional contributions and outstanding performance in Life Sciences and health care.
